

Meeting minutes: 20 minutes

Topic: Today we discussed our progress on each section of the hardware monitoring tool. We were able to iron out some bugs in the compatibility side and will continue to work on the UI of the tool. Linux compatibility was added for nvidia gpus and we are currently working to include amd functionality for linux as well.

We want to have functionality on most OS's by the end of the sprint.

People in the meeting:

Santiago Defelice - Team Leader - Structure and Starter code CPU

Justin Wissart - GPU - Fan speed & clock

Daniel Adriazola - GPU - temp & load percentage

Jonathan Gonzalez - Storage - usage percentage & read/write

Louis Flores RAM - RAM utilization & speed / Debugging
